## THE EXAMS

The criteria for designation as a Certified EHS Professional are extremely high. In most cases applicants must have a degree and at least four years of professional safety experience. With these high standards, why has the failure rate on the certified professional exams been so high? The Safety Fundamentals exam (ASP) failure rate has historically been about 50%!

We believe the reason for the high failure rate is because examinees have failed to understand the scope and complexity of the test, have relied on incomplete and misleading study material, and have used a shotgun approach in preparation for the exam

### PASS THE FIRST TIME

SPAN EXAM PREP workshops and materials offer a different technique proven to help pass the exams the first time. Workshops deliver a three day preparatory session in the classroom where we define the scope of the exam; illustrate the complexity of problems to be encountered; review basic math, science and calculator skills; discuss test strategy; examine reference materials and present a model home study program. In our workshops, you are provided with a professionally published workbook and EXAM PREP Software.

Like the traditional method of studying for these examinations, our workbooks use a "testing" format. During each workshop, we work and discuss about 350 questions typical of those encountered on the examination. Our questions come complete with **explanations**, not just answers, and all the explanations are keyed to the same reference material suggested by the BCSP and IHMM. This allows our students to gain an understanding of the subject rather than attempting to *memorize* an impossible number of questions and answers. These workshops are 24 hours in duration.

## COURSE INSTRUCTORS

**Daniel J. Snyder, CSP, CET, CHMM, CHMP** holds a B.A. in Science and a M.Ed. in Adult Education with specialization in Human Resource Development. He has over fifteen years of diverse international experience as a safety consultant and has served in leadership roles for the American Society of Safety Engineers, National Safety Council, and US Army Military Intelligence. Currently Mr. Snyder serves on the Board of Directors for the Alliance of Hazardous Materials Professionals. He is responsible for curriculum research, design and development as a Managing Partner for SPAN International Training, LLC.

**David L. Wheeler, CSP, OHST, CHST** has a B.S. in Occupational Education, with a specialization in Environmental Technologies. He has over thirty years' experience in the Environmental, Safety and Health field, of which ten years were spent as an Department of Defense Hazardous Waste Manager for a RCRA Part B facility. He is the senior instructor and has been a curriculum designer for Span International Training, LLC since 2001 for the ASP, CSP, OHST and CHST preparation courses. He is a Managing Partner for SPAN International Training, LLC.

### RETURN/REFUND POLICY

Workbooks must be returned within 30 days and are subject to a 15% restocking fee. Software, once activated, is non-refundable. Class cancellations are subject to a 15% cancellation fee up to 30 days prior and a 20% cancellation fee from 30 days prior until workshop start date. No refunds will be made after workshop start date.

### SELF STUDY MATERIAL

Volume one of our workbooks covers the spectrum material that could possibly be tested. Volume two contain several home study self-evaluation sessions

using the same question, answer and explanation format as in the workshop. The material included in the self-evaluation sessions is designed to supplement your home study program and reinforce those areas where emphasis is needed for the examination. The program will provide you with over 650 questions, answers and, **more importantly**, explanations.

### REGISTRATION AND FEES

Please register early by email/fax, phone or on our website. Class sizes will be limited to ensure personalized attention by the instructors for the basic math and science review. The entire course fee is \$900 which includes the self study workbook, EXAM PREP Software, and a BCSP/IHMM approved scientific calculator. If you have already purchased a workbook (current version), we will deduct the full purchase price of the workbook when you register. However, registration is not complete until the registration fee has been paid.

Private Workshops are available, please call for further information.
