Tuesday, October 18, 2011

Busch Student Center

Saint Louis University

20 North Grand

St. Louis, MO 63104

Conference Agenda

2011 Greater St. Louis Safety and Health Conference

7:15-8:00 Registration

8:00-8:15 Conference Welcome and Opening Remarks

8:15-9:00 Conference Keynote

Bob LoMastro

President, LoMastro and Associates

“Defining Safety”

Bob will set the tone for the conference with this motivational presentation. Learn to build a culture within your organization where everyone knows “how to be safe” and wants to do it!

9:00-9:30 Exhibitor Viewing

9:30-10:30 Breakout Session I

OSHA Update, Richard Fairfax, OSHA Deputy Director, Washington DC

At this always-popular session, learn what OSHA is doing to protect workplace safety and health and current agency priorities.

Back to the Ergonomic Basics, Dr. Jerome Congleton, Texas A & M University

Re-visit the principles of ergonomics and discover new methods to control this number one cause of workplace injuries.

Safe Handling of Compressed Gas Cylinders, David Maloney, President, CGS Safety

Are you certain that your company is properly handling compressed gas cylinders? Find out before it's too late!

Trench Safety, Joe Wise, Branch Manager, United Rentals

Excavations are a leading cause of death in construction. This session will help you review and update your trench safety program.

Surviving a Multi-Media EPA Inspection, Donna Ratkowski, P.E., Sr. Environmental Specialist, Afton Chemical Company

Are you prepared for an EPA inspection? Find out what you need to know *before* the inspector comes knocking on your door!

10:35-11:35 Breakout Session II

Fighting the #1 Killer of Workers, Mark Woodard, Sr. Loss Control Prevention Trainer, Missouri Employers Mutual

Motor vehicle accidents are the number one source of workplace fatalities. This session will help you establish or improve your company's fleet safety program.

OSHA's New Globally Harmonized System Standard, Dorothy Dougherty, OSHA Director of Standards, Washington DC

Do you have questions on OSHA's new GHS standard? Come to this session and listen to the OSHA official responsible for writing the regulation.

Safety 101: What You Need to Know Now That You're Responsible for Safety! AJ Gajdosik, CSP, Loss Control Consultant, Nationwide Insurance

So you've just been designated as your company's "Safety Person". Learn the basics and how to be effective in your new role.

Fall Protection in Residential Construction Roundtable, Dave Barklage, Midwestern Safety Equipment and Harry Miller, CSP, CHST, Safety Director, Carpenters' District Council of Greater St. Louis

OSHA recently changed its enforcement of residential fall protection. Learn how to comply from two industry experts.

Joplin Tornado Response, Randy Willoughby, Missouri Department of Natural Resources and Mark Banden, Kansas City OSHA Office

Get an inside glimpse into the cleanup efforts following one the nation's largest natural disasters.

11:35-12:30 Lunch (Provided)

12:30-1:30 Breakout Session III

Confined Spaces in Construction, Jessica Douma, OSHA Directorate of Construction, Washington DC. How will this long-awaited standard protect construction workers in confined spaces? Find out from the OSHA office that wrote the standard.

Chuck Adkins Forum, David Keim, Industrial Hygienist, St. Louis Area OSHA Office
Follow an OSHA Compliance Officer on a complex fatality investigation.

Electrical Myths, Bob LoMastro, President, LoMastro & Associates (2 hours)

If you have fond recollections of a science teacher who made a subject come alive and crackle with excitement, then you will surely enjoy this session. Office workers to journeyman electricians will learn more about this deadly force than they have learned in a lifetime. Special 2-hour session!

Scaffold Safety, Ray Boehm, CSP, Director of Compliance, L. Keeley Construction and ADB Utility Contractors Scaffolding regulations are always among the most frequently cited by OSHA. Learn from an industry expert how to comply with the standards.

Essential Elements of an Emergency Response Program, Rick Haase, Emergency Response/ Security Team Leader, Conoco Phillips Woodriver Refinery

Planning before an emergency is critical for an effective response. This session will explain the “do’s and don’ts” of an effective program.

1:30-2:00 Exhibitor Viewing

2:00-3:00 Breakout Session IV

Workers’ Comp Update, Michael Banahan, Evans-Dixon

What are the latest court cases and rulings that could affect your company? Come to this important session and discover what you need to know!

Radon: What It Is and What You Can Do About It, Barbara Sassi, MS, Environmental Specialist III, Missouri Department of Health and Senior Services

Enhance your awareness of the dangers of radon gas, as well as how to detect and control it.

Crane Safety Update, Patrick Wineburner, CSP, VP of Safety and Risk Management, Budrovich Construction and Roosevelt Shavers, Industrial Hygienist, St. Louis OSHA Office
Discover the industry and OSHA enforcement perspectives of this newly-issued standard.

MSD Sewer System Modifications, MSD Speaker Learn about the latest issues in storm water management and the industrial pretreatment of wastewater from an expert at the Metropolitan Sewer District.

3:05-4:05 Breakout Session V

The Supervisor's Safety Toolbox, Bill Dampf, CSP, Manager of Corporate Safety and Training, Ameren Corporation

Given the supervisor's strategic location within your organization, literally every new program or process that impacts the hands-on part of your business falls on your supervisor's shoulders to carry out. This program is aimed at helping them understand their importance and provides tools to help them be successful.

Emerging Standards for Protective Apparel: How ISO 16602 Can Help the Safety Professional, Rodney Taylor, End-Use Marketing Manager, DuPont Protection Technologies

Currently North America does not have a comprehensive standard for assessing the performance of chemical protective clothing. ISO 16602 could be the solution to ensure appropriate clothing for workers facing chemical hazards in industrial situations.

Contractor & Supplier Evaluation: Developing an Effective Pre-Qualification Program, Jon Alexander, Monsanto Corporation

Your company's safety program should include hiring safe contractors. Learn how to evaluate and select the right contractors, and monitor their safety performance.

VPP Critical Elements, Mike Minicky, CSP, Compliance Assistance Specialist, OSHA St. Louis Area Office

OSHA's VPP program is alive and well! This session will review the minimum program elements to qualify for this prestigious certification.

Distracted Driving, Dennis Hamann, NSC Certified DDC Instructor

Over 50 research studies have shown using cell phones while driving is risky, and most drivers today are not aware of how many distractions are taking away their abilities to drive safely. Knowing the distractions we face each day will enable the safety professional to better educate their employees.

Application has been made for 1 ABIH CM and 0.6 CEU points.

This program has also been submitted to HR Certification Institute for review.
