National Safety Council Professional Truck Driver Course

3 hour Training with CEU's

The newly revised **NSC Professional Truck Driver** Course can be taught in either 3- or 4-hours using its modularized format and provides customized facilitation options based on learner needs and company goals. State-of-the-art multi-media technology integrates course content with videos and real-life driver scenarios to improve and enhance learner experience.

Participants acquire the knowledge and defensive driving strategies to help them remain incident- and citation-free by focusing on collision prevention through hazard recognition and crash avoidance techniques.

Instructor Resource Kit includes: Fully-scripted Instructor Manual, Multimedia Disk Set with videos, animations, presentation slides and classroom activities, Student Course Guide, various testing strategies to measure driver progress and competency level throughout the course, 20-question (multiple-choice) Post Test and Course Completion Record. Course Completion Record is provided on a CD with an easy-to-follow format for personalization and immediate printing.

Some of the course topics include:

- Defensive driving and collision prevention strategies – speed, proper following distances, lane changes and lane marking's, passing and overtaking, correct scanning techniques and critical thinking
- Handling challenging situations – head-on collisions, turn and intersection collisions, backing, distracted driving, and factors contributing to collisions
- Managing Hazard recognition and conditions beyond our control and not overdriving our abilities and the capabilities of our equipment, and more!
