Principles of Occupational Safety and Health (POSH)

4 days (32 hours)

Credits: 2.6 NSC CEUs

The certificate in Principles of Occupational Safety and Health is an intensive four-day course covering 19 topics that provide a solid understanding of fundamentals of workplace safety and health. The course focuses on best practices for implementing and managing a safety program.

POSH is a great introduction for anyone new to safety responsibilities and an excellent review for experienced safety practitioners.

You Will Learn:

- How to examine prior incidents to help you avoid mistakes and maximize the effectiveness of your safety initiatives
- Record-keeping to prevent injuries and meet OSHA requirements
- How to develop and emergency action plan
- How to plan and conduct safety inspections
- The impact of industrial hygiene and HazCom standards on your safety plan

Completion of POSH qualifies you to pursue the [NSC Advanced Safety Certificate](#), a nationally recognized safety program that sharpens your safety and leadership skills so you can drive fundamental safety change throughout your organization.

For individuals on a career path in safety, this program provides a clear roadmap and best-in-class education to meet many industry-leading certification requirements.
